Abstract Please make sure NO reference number in your Abstract since it is misunderstood independent of full text.

Keywords aaaa; bbbb; cccc

MR(2020) Subject Classification xxx; xxx; xxx

1. Introduction

Please make sure that your paper contains correct reference sequence (If NOT, please resort them according to its appearance sequence, not alphabetical order. Moreover, please make sure that each bibliographical item is labelled such as [1–3].

All equations, theorems, definitions, lemmas, propositions, corollaries, examples, remarks etc. would be better to be numbered consecutively and unrepeatedly within each section. For example, Definition 2.1, Lemma 2.2, Theorem 2.3, ...

Theorem 1.1 ([1]) *The statements of theorems, lemmas, definitions, propositions, corollaries, conjectures, etc. are set in italics.*

Proof Observe that

$$\begin{aligned} AAAAAAAAAA =& BBBBBBBBBBB+ \\ & CCCCCCCCCC \\ =& DDDDDDDDDDDDD. \end{aligned} \tag{1.1}$$

Now apply induction on n to (1.1)...

Remark 1.2 Remarks, examples, problems, etc. are set in roman type.

$P(x)$	i	$(e(1), e(2), e(4))$	$(e(3), e(6), e(12), e(24))$	$T(E)$
P_1				$\emptyset$
P_2	4		$(1,1,1,0) \to (0,0,0,1)$	2
P_3	2		$(1,1,1,0) \to (0,0,2,0)$	1

Table 1 Aaa bbb ccc

Supported by ... (Grant No. ...).
